Welcome to The Cochrane Library

The Cochrane Library contains high-quality, independent evidence to inform healthcare decision-making. It includes reliable evidence from Cochrane and other systematic reviews, clinical trials, and more. Cochrane reviews bring you the combined results of the world's best medical research studies, and are recognised as the gold standard in evidence-based health care.

People doing things

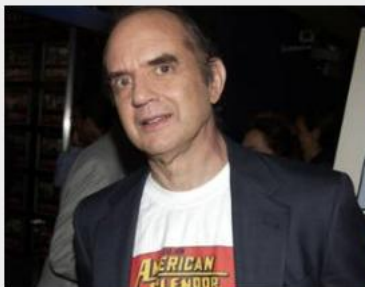

Walter Johnson , MD
Type: Practitioner and Researcher
Age: 45
Profession: anesthesiologist
Location: Cincinnati, USA

Dr. Walter Johnson is a board certified anesthesiologist who has practiced in the Cincinnati area since 1991. A Ohio native, he obtained his medical degree from the University of Ohio and completed his subsequent residency training at the University of Illinois. In addition to his work as an anesthesiologist. Dr. Walter's

Harvey Johnson
Type: Consumer
Age: 50
Education: High School diploma
Profession: Civil Servant
Location: Bristol, UK

medicine and in the idea of some fellow (use of evidence) [prepared by

Harvey was recently diagnosed with depression. He is not very tech savvy. He uses the web search engines and reads papers on the web. Since his diagnosis, he's been scouring the web for information

related to his illness. Harvey is a skeptic at heart and is very open to the idea of evidence in health care. He is hoping to find a treatment that is non-invasive (drugs with adverse side effects, for example) and is open, though skeptically, to the idea of alternative medicines and therapies such as St. John's Wort or music therapy.

[prepared by Chris]

Roxanne Aga
Type: Student
Age: 26
Profession: Second-year medical student
Location: Barcelona, Spain

Roxanne is attending a first-rate Medical school in Barcelona studying to be a general practitioner. Her father, Juan, is a GP and Roxanne hopes to follow in his

She is very interested in EBM. She has taught in the Fall course. Her basic ques

Dr. Franz Bettinger
Type: Practitioner
Age: 60
Profession: MD, General Practice and Sports Medicine
Location: Germany

Dr. Bettinger is a GP with his own practice in a small German town. He has been in practice for 30 years and is interested in epidemiology and EbM for 15 years. He is computer literate and speaks English well. He wants to apply EbM more routinely in his daily practice, but, lacking access to full-text databases or to help from information professionals, he relies on searching for evidence in the freely available parts of CLiB, i.e., abstracts and summaries. He has extensive experience searching

www.cochrane.org/reviews and has contacted Cochrane to share his criticism of the current review format and search functionalities, which he finds unhelpful, and has offered useful suggestions for a better search navigation and review organization.

[prepared by Caroline]

Mohamat Sarhani
Type: Review author
Age: 27
Profession: Research Associate
Location: India

Young research associate in pharmaceutical company's research arm, specializing studies of drugs for childhood neural disorders. Special interest in faked drugs from China. Very motivated. No money. His boss is EbM savvy, and paid for Mohamat to attend a virtual author

training last year. He's got no statistical training, but is excellent in assessing trials and writing about them in English. Shy about communications with non-Indians.

[prepared by Dave]

Silvia Boralis
Type: Cochrane staff
Age: 22
Profession: Assistant Review Group Coordinator / TSC
Location: Italy

Just began as with her first post-college job, having done a few projects under the same group when studying. Wants to bring EbM to the Italian world - very enthusiastic, but doesn't know how to start, and her boss (the Co-Ed) has no time to help, and the RGC is on maternity leave. The phone rings constantly as authors ask for her assistance. She speaks very poor English.

[prepared by Dave]

Ray Manning
Type: Press
Age: 44
Profession: Medical journalist and Marketing agent
Location: USA

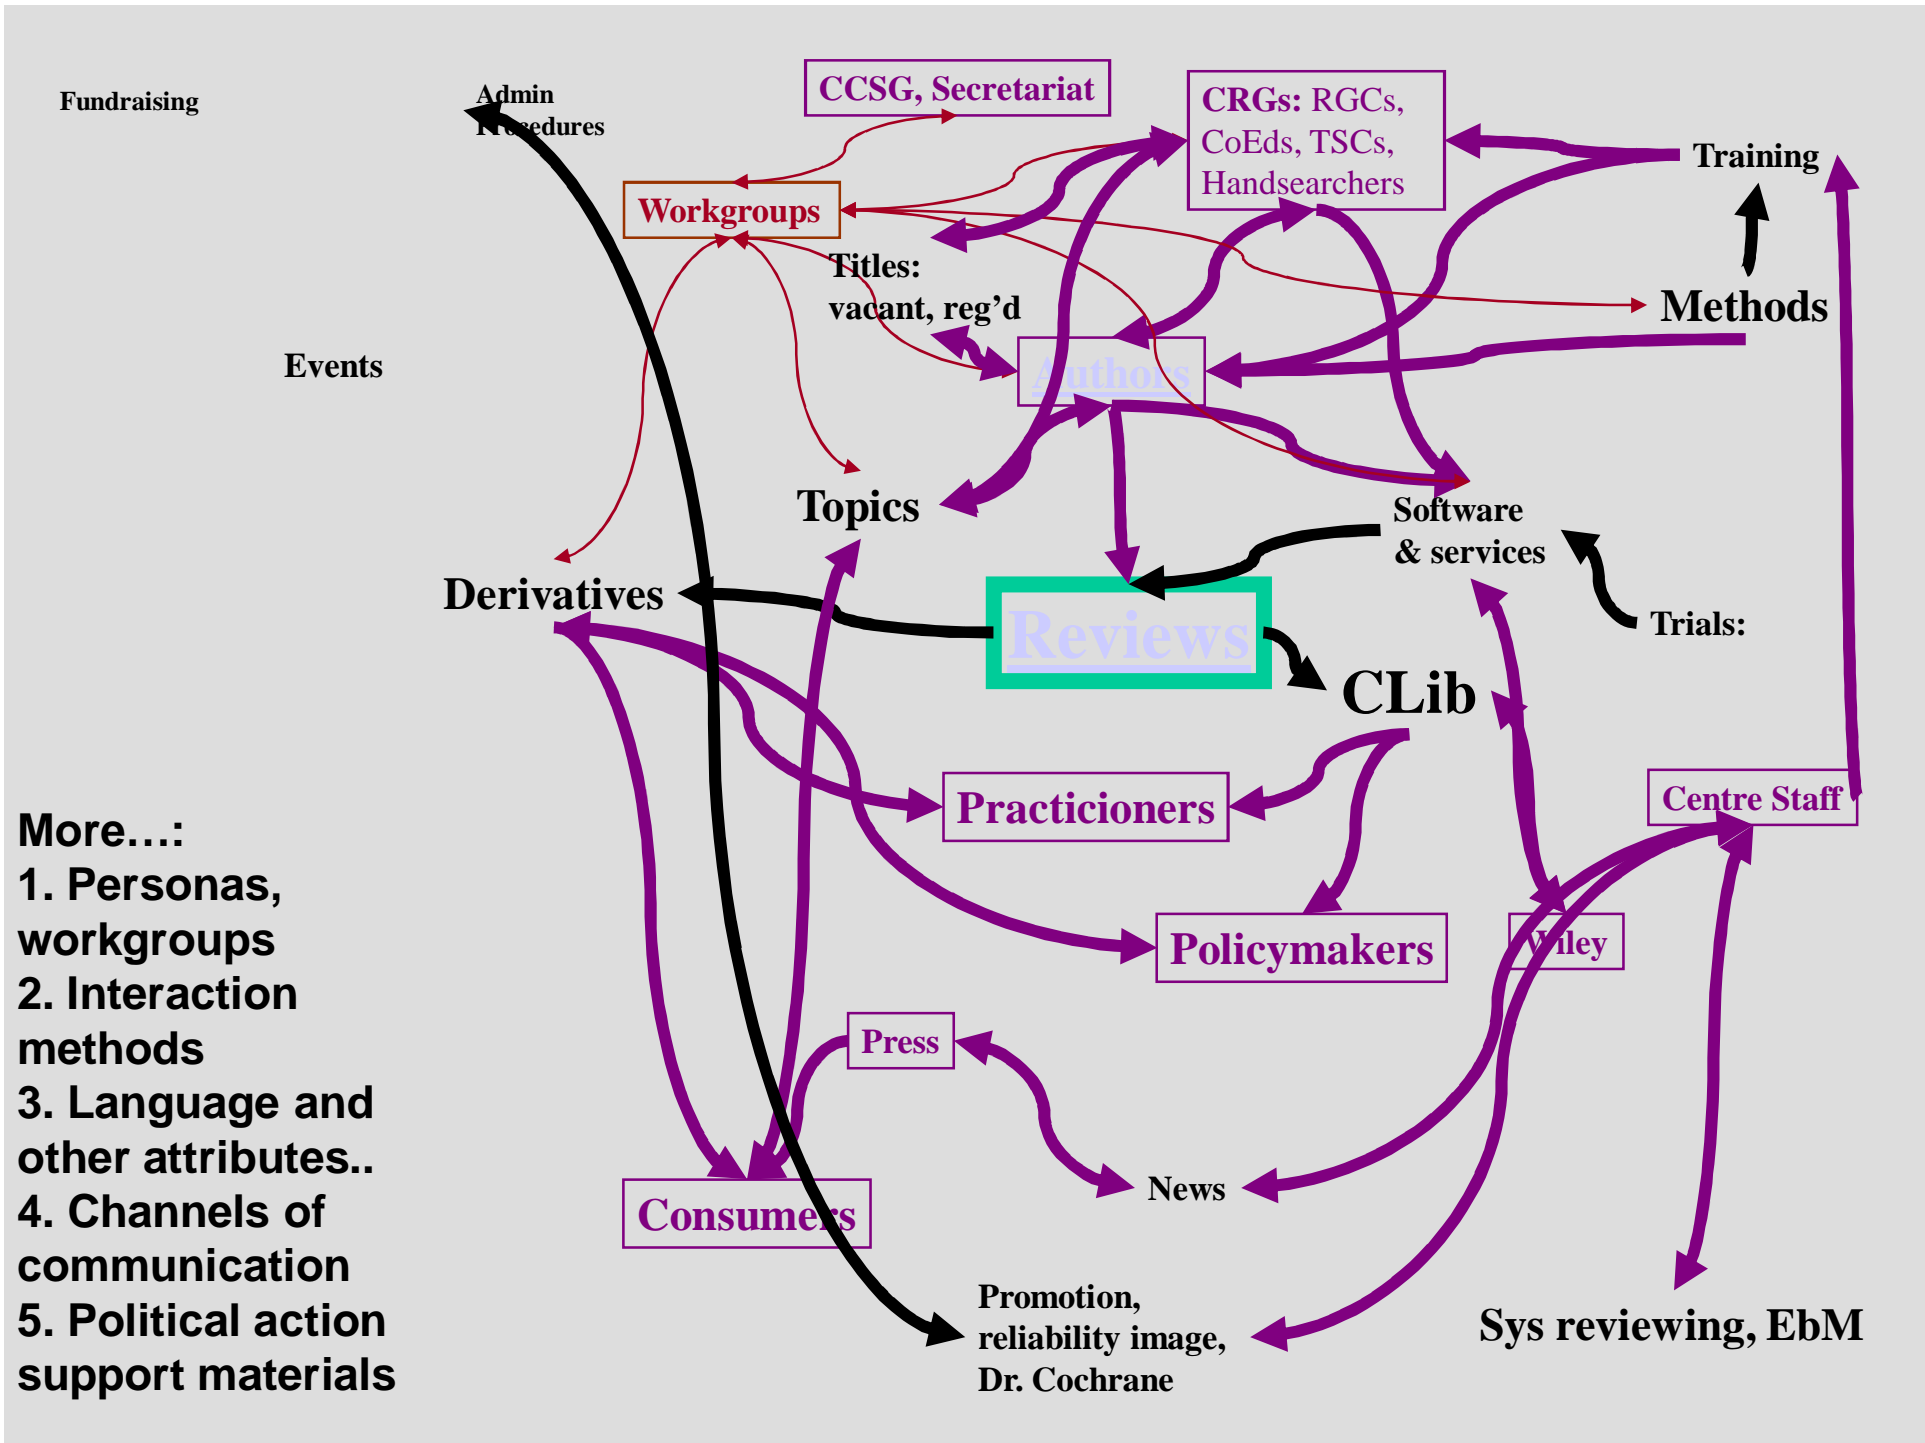

Sports background, sold vitamin supplements as side-job, now does marketing for the same company as side-job. Day job is as sports and medicine writer for a small regional newspaper, contributing occasionally via

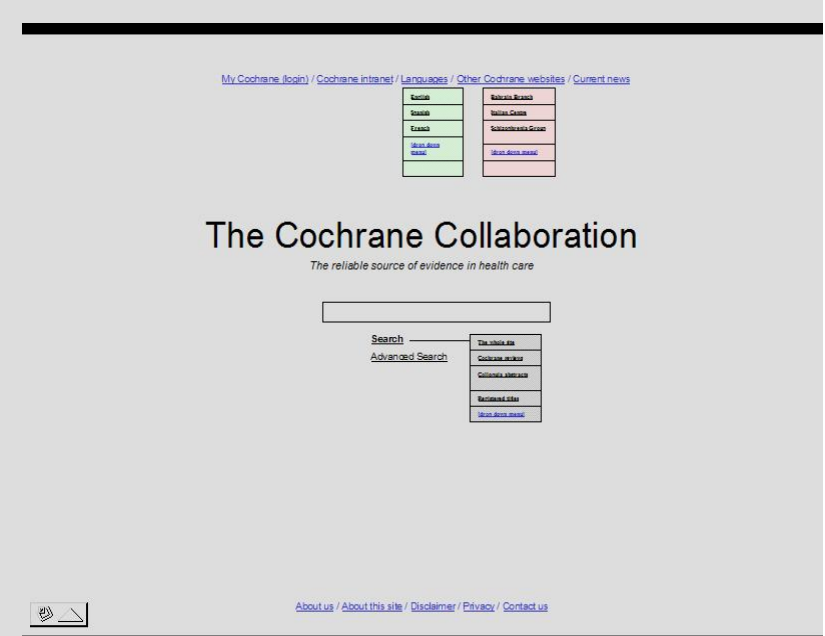

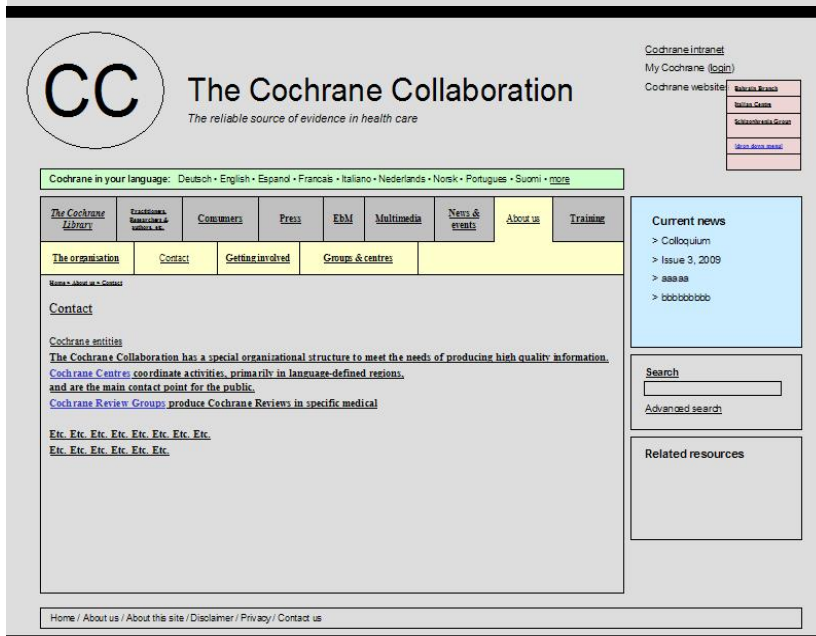

blogs and syndicated column to a handful of online popular medical portals. Not particularly knowledgeable of EbM, but needs to find evidence to support what he sells and it helps his writing, too.

G-CSF and GM-CSF for treating or preventing neonatal infections

Carr R, Modi N, Doré CJ

Bookmark this: more ...

Email this page

Summary

G-CSF and GM-CSF for treating or preventing neonatal infections

Infants born before 32 weeks and infants that are small for their gestational age are at high risk of developing infections while in hospital. These infections can cause death, disability (including cerebral palsy) as a result of damage to nervous tissue as well as contributing to chronic lung disease. Infection-related deaths have remained constant for two decades and antibiotic resistance is increasing, emphasising the need for new ways to prevent infection.

The haemopoietic colony stimulating factors (CSFs), granulocyte-macrophage colony stimulating factor (GM-CSF) and granulocyte colony stimulating factor (G-CSF) are naturally occurring substances (cytokines) that can increase circulating white blood cells (neutrophils) and their ability to destroy bacteria. Common minor side effects are low grade fever and skeletal pain. The review authors identified seven treatment studies of 257 premature infants with suspected systemic bacterial infection. Adding G-CSF or GM-CSF to antibiotic therapy did not improve survival, overall. It may be, however, that infants who had clinically low neutrophils at the start of treatment did show some reduction in number of deaths by day 14 (taken from three studies). In three studies in which 359 low birthweight or premature neonates were treated preventatively (prophylaxis) no reduction in deaths was evident in those neonates receiving GM-CSF. GM-CSF was well tolerated with no adverse reactions in these small studies.

This is a Cochrane review abstract and plain language summary, prepared and maintained by The Cochrane Collaboration, currently published in The Cochrane Database of Systematic Reviews 2009 Issue 2, Copyright © 2009 The Cochrane Collaboration.
